

Mr. Steve Cinnamon
Integrated Pest Management Coordinator
USDI National Park Service
Midwest Region
1709 Jackson Street
Omaha, NB 68102-2571

Dear Mr. Cinnamon:

A summary of the 1983-1997 gypsy moth trapping program at Hopewell Cultural National Historical Site is enclosed for your information (Table 1). The purpose of the trapping program is to monitor low level gypsy moth populations and help determine when more intensive survey methods should be employed.

I am pleased to report that no male gypsy moths were trapped this past season. ~~Based~~ ^{populations} ~~Based~~ on the results, gypsy moth ^{populations} will not have an impact on the forest resource at Hopewell ^{Culture NHS} in the immediate future. We would like to continue the trapping program at this site in 1988.

Thank you for your continued cooperation and if you have any questions regarding these results, please call me at (304) 285-1556.

Sincerely,

Karen D. Felton
